

Your Chemical Start Up Kit Instructions

****Based on a 1700L Spa****

Step 1

This is a good time to learn how the water flows through your spa.

1. Fill your spa with water through the black tube at the bottom of the filter cavity (to prevent air locks) & turn power on. (refer to owner's manual)
2. Simply turn all the pumps on open up all the jets.
3. Turn all the small air controls on the top of the spa to the on position
4. You will see the air venturi through the jets.
5. If you have them, move the large diverter knobs from left to right, to learn what does what.

This will show you how the water moves through your spa. Your user manual & warranty cards are inside the cabinet (underneath the touch pad) along with a quick reference guide on how to use your touch pad. You will also find your hard cover keys, screws & drain pipe connection. When adding spa chemicals to your spa, ensure that the filtration pump is running.

Step 2

Alkalinity Up

20gm Per 1000 Litres (1 Tablespoons)

NB: 1700L Spa (30g or 30mL OR 1 ½ Tablespoons)

If you use a tablespoon to measure make sure you do not use it for cooking or eating

Balance your Spa on start up

1. This product raises your Alkalinity and PH Levels. Ideal levels are 7.2-7.6 always test the water before adding chemicals.

Dissolve the appropriate amount in a bucket of water before adding it to your spa water. Apply the solution evenly around the spa with **pump 1** running for **20 minutes**, with your hardcover off the spa.

Increases pH and Total Alkalinity in spas.

Step 3

Lithium Sanitiser

20gm Per 1000 Litres (1 Tablespoon)

NB: 1700L Spa (30g or 30mL OR 1 ½ Tablespoons)

If you use a tablespoon to measure make sure you do not use it for cooking or eating

Oxidise your Spa on start up

1. Dissolve the appropriate amount in a bucket water before adding it to your spa water. Apply the solution evenly around the spa with **pump 1** running for **20 minutes**, with your hardcover off the spa.

Controls bacteria, viruses and algae in spas.

Step 4

OxyShock

45gm Per 1000 Litres (2 Tablespoon)

NB: 1700L Spa (55g or 55mL OR 2 ½ Tablespoons)

If you use a tablespoon to measure make sure you do not use it for cooking or eating

1. Dissolve the appropriate amount in a bucket of water before adding it to your spa water. Apply the solution evenly around the spa with **pump 1** running for **20 minutes**, with your hardcover off the spa.

Eliminates organic contaminants and chlorine odours in spas.

Step 5

Natural Clarifier

2 caps per 1000 litres

NB: 1700L Spa (3-4 caps worth directly into water)

Clarify your water on start-up, prevents cloudiness of water.

Clears cloudy spa water.

1. Ensure water is balanced & filters are clean before use
2. Run **pump 1** for at least 20 minutes.

Email: info@maax.com.au

Step 6

Nature 2 Cartridge

1. Simply insert it into the bottom of your spa filter
2. Making sure the narrow end is facing down as not to interrupt the flow through the filter.

Clean, clear water without harsh chemicals

After every use:

Lithium Sanitiser

20gm Per 1000 Litres (1 Tablespoon)

NB: 1700L Spa (30g or 30mL OR 1 ½ Tablespoons)

If you use a teaspoon to measure make sure you do not use it for cooking or eating

1. Dissolve the appropriate amount in a bucket of water before adding it to your spa water. Apply the solution evenly around the spa with **pump 1** running for **20 minutes**, with your hardcover off the spa.

Controls bacteria, viruses and algae in spas.

Weekly Maintenance

Pool & Spa Test Strips

Test your spa Weekly

It does not need to read Chlorine / Lithium Hypochlorite as burns out of the water 2-3 hours after application, do not add more Sanitiser if the spa pool shows no Chlorine/Lithium Hypochlorite

1. Check Ph & Alkalinity if it is low or high add your weekly doses as below
2. Test the water again after 30 mins and if the PH & Alkalinity are still incorrect add 1/2 tablespoon of Sanitiser / Lithium.
(NB: based on 1700L)
3. If the spa water still reads incorrect balancing, you may need to use an increaser (Alkalinity up) or decreaser available at your local Maax Spa/Jadan Spa Showroom.

Step 1 / Weekly

OxyShock

20gm Per 1000 Litres (1 Tablespoon)

NB: 1700L Spa (30g or 30mL OR 1 ½ Tablespoons)

If you use a tablespoon to measure make sure you do not use it for cooking or eating

2. Dissolve the appropriate amount in a bucket of water before adding it to your spa water. Apply the solution evenly around the spa with **pump 1** running for **20 minutes**, with your hardcover off the spa.

Eliminates organic contaminants and chlorine odours in spas.

Step 2 / Weekly

Natural Clarifier

2 caps per 1000 litres

NB: 1700L Spa (3-4 caps worth directly into water)

1. Ensure water is balanced & filters are clean before use
2. Run **pump 1** for at least 20 minutes with hardcover removed from the spa.

Clears cloudy spa water.

Monthly

Filter Cartridge Cleaner

125g Satchel

To clean your filter cartridges

1. Fill a bucket with enough hot water to cover the filter cartridge & add the whole 125gm of the filter cartridge cleaner to the bucket.
2. Soak Filter(s) for 6-12 hours (overnight)
3. Remove the cartridge from bucket & hose off any remaining material (do not use a high pressure hose)
4. Place the cartridge back into the spa. (reinsert nature 2 stick as per step 5)

Removes organic contaminates from the spa cartridge
